### Abstract of FR2770318 (A1)

The distribution system has a site (V) equipped with a smart card reader (200) that accepts the user's smart card (10) and a smart card (20) held by the distribution outlet, rating parking entitlements allowed by the parking operator (OP). The reader transfers entitlements from the distributor card to the user card. The user card is accepted by payment units (H) at parking locations. User card to Distributor card 20 Parking operator OP Car readers at parking stations H.
